1996 Measure B: A Silicon Valley Success Story

Overview

In November 1996, Santa Clara County voters approved a landmark nine-year, half-cent sales tax to fund improvements to county roads, highways, bicycle and pedestrian pathways, and rail networks.

The 1996 Measure B Transportation Improvement Program outlined a diverse list of projects, from widening congested highways and filling in potholes on local roads and expressways, to expanding public transportation to connect business centers and residential communities throughout the county. The mandate was clear: Silicon Valley residents were willing to tax themselves to build a well-rounded transportation system to help them get to work more quickly, easily, and safely. Santa Clara County and VTA committed to relieving major traffic congestion and improving transit access in less than 10 years.

We Deliver!

VTA and the County of Santa Clara entered into a formal agreement to deliver the ambitious set of rail and highway transportation improvements to Santa Clara County's electorate. The County established the program, prioritized transportation projects, and acted as the "bank funding source and project monitor," dispersing sales tax revenues for project construction. VTA took on the role of the "contractor," implementing rail and highway projects to move Silicon Valley's workforce, with the help of private sector engineering and construction companies. VTA also successfully secured outside funding to augment the program in a declining economy, delivering more projects than local funds alone would allow. With local, regional, and statewide support, the partnership delivered a myriad of highway and rail improvements one after another. VTA frequently bested baseline schedules and budgets in project delivery.

Continued Support and Resilience

The economic decline in Silicon Valley resulted in ten consecutive quarters of decreased sales tax revenues, and, as a consequence, VTA and the County shifted transportation project priorities to be delivered with 1996 Measure B sales tax. Throughout this economic hardship facing Silicon Valley, the partnership has remained steadfast to the commitments approved in November 1996. Taking a long-term view, the County of Santa Clara and VTA are committed to delivering 1996 Measure B projects that will help keep Silicon Valley moving, whether by wheel or by rail.

How to Reach Us

For more information about VTA projects, call VTA Community Outreach at (408) 321-7575 or TDD for the hearing impaired at (408) 321-2330. You may also visit us on the web at www.vta.org, or email us at community.outreach@vta.org.

For information regarding existing light rail and bus service, please contact VTA Customer Service at (408) 321-2300, TDD for the hearing impaired at (408) 321-2330, or visit us on the web at www.vta.org.
